TAPED JOINT:
LOW RISK of hydrostatic water pressure

FULLY WELDED JOINT:
HIGH RISK of hydrostatic water pressure

KEY TO MATERIALS:

1. Visqueen Ultimate GeoSeal.
2. Visqueen Ultimate Double Sided Tape.
3. Visqueen Ultimate Lap Tape.
4. Smooth slab or blinding layer.

NB: Ensure careful placement of steel reinforcement to avoid damage to the DPM.

In order to develop a robust design for protecting a structure against groundwater, a Risk Assessment must be carried out in line with the guidance given in BS8102:2009.

The Designer may need to specify one or a combination of waterproofing measures.

All Visqueen materials must be installed in strict accordance with the manufacturer's instructions. Refer to the current Visqueen datasheets.

Do Not Scale - Use Figured Dimensions Only.
