Details issued for Guidance Only.
Designer’s Approval Required.

Site construction sequencing should be assessed before the appropriate Visqueen Standard Detail is selected & approved by the Designer.

In order to develop a robust design for protecting a structure against groundwater, a Risk Assessment must be carried out in line with the guidance given in BS8102:2009.

The Designer may need to specify one or a combination of waterproofing measures.

All Visqueen materials must be installed in strict accordance with the manufacturer’s instructions. Refer to the current Visqueen datasheets.

Do Not Scale - Use Figured Dimensions Only.

Typical Level Threshold Detail
(Locally Raised Ground Level).

KEY TO MATERIALS:

1. Visqueen Zedex CPT DPC.
2. Visqueen Zedex CPT DPC.
3. Visqueen Radon R400 Membrane.
4. Visqueen Double Sided Tape (10m x 50mm).
5. Visqueen Pro Single Sided Tape.
6. Visqueen Vapour Barrier or HP Vapour Barrier.
8. Rigid insulation by others to support gas DPC.
