In order to develop a robust design for protecting a structure against groundwater, a Risk Assessment must be carried out in line with the guidance given in BS8102:2009.

The Designer may need to specify one or a combination of waterproofing measures.

All Visqueen materials must be installed in strict accordance with the manufacturer’s instructions. Refer to the current Visqueen datasheets.

Do Not Scale - Use Figured Dimensions Only.

**KEY TO MATERIALS:**

1. Visqueen Ultimate VOC BLOK.
2. Visqueen Ultimate Double Sided Tape.
3. Visqueen Ultimate Lap Tape.
4. Smooth slab or blinding layer.

**NB:** Ensure careful placement of steel reinforcement to avoid damage to the DPM.

**TAPED JOINT:**
LOW RISK of hydrostatic water pressure

**FULLY WELDED JOINT:**
HIGH RISK of hydrostatic water pressure
